

# LOWER GENOCIDE & RAPE

## LEAVE / OSTRACIZE / BAN CIRCUMCISION “RELIGIONS”

### FACTS:

96% of genocides happen between one or a pair of majority practicing groups.

Rape is 2-300% higher per capita in majority practicing groups.

Death penalty, torture, terrorism, and excision, are all more common in circumcision cultures.

### REASONS:

When you put violence into people, violence comes out of people. The abused become abusers. In the case of sexual mutilation, it is the same. Because this trauma is inflicted on infants, the explicit memory is not there, but the emotional mark is. Infant sexual mutilation impacts: emotional development and parental bonding.

### LAW:

Abrahamic religions (Jews, most Christians, and Muslims) are not welcome in America for these legal reasons: aside from being assault, infants cannot consent to being mutilated/modified, therefore it is an unconstitutional violation of the rights of another.

Charles Manson was prosecuted not for doing violence, but encouraging it; Rabbis, Priests, and Imams are guilty of this. When a rapist murders a child offender, some people laugh approvingly; what is the difference between a regular Rabbi and a Manson of sexual violence? The Rabbi is worse.

Religions which encourage assault of others, and children especially, will become widely recognized as immoral, then illegal. Abrahamic religion is not only ineligible for tax exempt status as a 501(c)(3) entity in the United States, but entirely unconstitutional as this violent act defines their core beliefs. They do not exist without the “covenant” (legal contract with God). While the government cannot ban religions, they can ban practices as evident with polygamy and cannibalism. Banning infant mutilation effectively bans these religions, which is progress.

Infant genital mutilation culture is rape and genocide culture. Supporters of Abrahamic religion support rape and genocide culture. If you are one of them, you are now aware (sin of commission), and may turn against the practice as a good person would.
